#1417	Garlic - Spring (green) 2 packages available. Order number of packages. Green garlic is simply immature garlic with fresh green tops. To use, trim off root ends and any tough part of the green leaves. Chop or slice white, light green, and the first few inches of the dark green leaves (as long as they are tender). Use as you would green onions or garlic, noting that it is stronger than the former but milder than the latter. The flavor of green garlic is still garlicky, but is much more mild with less of a bitter bite. When cooked, the green garlic sweetens, lending a new layer of depth to a dish. The green garlic can be stored under refrigeration for three to five days before being used, and it will not cure like regular garlic, so make sure to use it up. Package contains a minimum of 10 plants.	All Natural	\$3.25/package
#609	GARLIC GARLIC GARLIC (granules and powder) 5 packages available. Order number of packages. For a wonderful flavor enhancement that makes savory dishes taste even better without imparting a strong garlic taste, this mix of granules and powder is perfect. Grown and processed -not in China- but right here on the High Plains from a blend of several varieties grown without chemical fertilizers or pesticides. It is carefully peeled, sliced, dried and ground in small batches as needed to maintain that robust garlic flavor. Remember-since there are no artificial preservatives, fillers or anti-caking agents added, a little goes a long way. - 1/8 teaspoon = 1 small garlic clove. Excellent when mixed with butter and used for toasted garlic bread! Package contains a minimum of 2 Tablespoonsful	All Natural	\$2.15/package
#1616	Toasted Garlic Salt 2 jars available. Order number of jars. Contains only Redmond Real Natural Sea Salt and lightly toasted garlic. No artificial flavors or fillers so a little goes a long way. #649	<p>About Leader Organics All Natural Beef Order number of packages. All of our beef is raised all natural black angus with no hormones. Our beef is raised by my dad (Tim Sussex) on his ranch near LaGrange, Wyoming. The cows roam in wide open pastures all year round. They graze on the grass until there is a snow storm, they are then fed grass hay that my dad cuts and bales the summer before. We call our beef grass fed, corn finished which means they are grass fed and then fed corn only 30 days before being processed along with grass hay, the corn is more of a \"snack\" for the cows, this gives the meat tenderization and flavor. My dad loves his cattle and working with them. When it comes time to move the cows from one pasture to another he uses one of his best friends, his horse to gather and move the cows. This way the cows do not stress themselves out while they roam through the wide open Wyoming grasslands.</p>	All Natural

No oil or other liquid is required, although the rub coats the meat better if a small amount of oil is applied to the meat first. For a more robust flavor rubs should be applied up to 4 hours prior to cooking. Unlike commercial mixes whose main ingredient is generally salt, our seasonings contain little or no salt and when we add salt we use sea salt. Any of our herb seasonings or meat rubs can be used in vegetables, on pasta, or for herb butters as well. You are only limited in their use by your imagination! #318	Catnip - Dried Order number of packages. Many cats prefer their catnip dried rather than fresh (although ours like it both ways, depending on their mood!). Our catnip comes in resealable baggies. It won't take much to excite kitty, so we recommend storing any leftover leaves in a secure place away from the cat; they love to open the package on their own and are quite adept at scattering it throughout the house. Packaged in a snack sized ziploc bag.	All Natural	\$3.95/package

#1234	Crockpot Refried Bean Kit Order number of kits. Easy, hearty, healthy and delicious, this is one of my favorite sides. While most commercially prepared refried beans contain lard & preservatives, this kit uses locally grown pinto beans, seasonings (msg free), water & an onion. Trust me, you won't miss the lard and preservatives a bit! It takes less than five minutes to get them into the crockpot; then let the crockpot do the work! Eight hours later you can simply drain the beans and serve them as whole pintos, or run them through the blender and have refried beans. Tastes so much better than the refried beans available in the store, and so much healthier too! Each kit makes between 4-6 cups of refried beans, or 4-5 cups of cooked pintos. You provide the onion and water.		\$3.50/kit
